

## News Release

# Papertech achieves record sales in 2011

Vancouver, Canada, January, 2012

*Papertech Inc. has achieved a new sales record in 2011 for its WebVision® and WebInspector® digital camera systems.*

*Papertech's industry leading WebVision event capturing camera system, with over 580 systems operating in over 30 countries, continues to be the number one web monitoring system globally. Now together with the newer WebInspector, web inspection quality control system with references in 15 countries, and with continued upgrading of older and non-performing other camera systems, over 100 orders were achieved in 2011.*

*This new record represents a major testimonial of Papertech's ability to deliver results and service that customers worldwide expect in these difficult and uncertain economic times.*

*Once again, many new innovations were introduced in 2011 including advances in our TotalVision™ web inspection integration, ultra high powered LED pulsed lighting and wet-end WebInspector. Also all of our technology continues to be based on our from day one objective to only offer: open, easy to service – easy to maintain, non-proprietary component architecture.*

*Papertech Inc. represents the industry's most experienced event capturing & web monitoring camera system supplier. Our success is a result of continuous innovation and a commitment to effectively service our installed base.*

### WebVision in action!

The images above show how accurate WebVision is and how it pinpoints defects to help papermakers and tissue makers detect breaks and find the root cause of breaks and defects.
