

## TotalVision™ Muv-e V.3

The TotalVision™ Muv-e Cart provides you with a portable “All-In-One” system that is designed to be easily moved to the problem area in your process and quickly set-up for trouble-shooting.

### Features of the Muv-e Cart include:

1. Plug and play design, with all cables included, means you just connect the AC power, camera(s) and LED(s) and you’re ready to go.
2. Solid state system provides exceptional reliability.
3. Supports 1 to 4 digital cameras, with base system configured for 2 cameras.
4. High performance processors insure that every frame of video is captured, analyzed and easily accessed for review.
5. Accepts an external digital trigger for capturing events when they occur.
6. Dedicated hard drive provides up to 24 hours of shared video storage for each pair of cameras. A single 750gb drive is supplied with the first computer (for cams 1 & 2) and a second 750gb drive supplied with the second computer (for cams 3 & 4).
7. External USB Ports make it simple to save image/video files for use on other computers.
8. Can easily be connected to Mill Intranet using surface mount connectors on computer box.

### System Options

- System expansion from 2 cameras to 3 or 4 cameras using same computer enclosure (cutouts included in base system).
- Wireless connectivity
- Available for use as a field mounted operator station
- Camera/LED power box can be cart mounted (as shown in picture) or supplied as loose item for installation flexibility.
- I/O upgrade available to accept an analog speed input to help synchronize multiple camera videos.
- Full range of camera and housing options for use in paper, pulp, and converting lines.
